

## STANDARD GENERATOR INTERCONNECTION PROCEDURES (GIP)

(Applicable to Generating Facilities Connected to the Transmission System – 69kV and above)

Notification of change  
July 18, 2007

The GIP as approved by the UARB on May 31, 2005 was based on the FERC documents of the time. FERC has since issued an erratum which includes the correction described below. NSPI agrees with this correction and intends to file the updated GIP with the UARB at the next opportunity. Until such time, we intend to follow the corrected version of section 11.1 as shown below.

FERC erratum:

Section 11.1: In the second sentence, change "*... Interconnection Customer shall tender a draft LGIA, together with draft appendices completed to the extent practicable*" to "*... Transmission Provider shall tender a draft LGIA, together with draft appendices.*"

NSPI GIP:

### 11.1 Tender

Interconnection Customer shall tender comments on the draft Interconnection Facilities Study Report within 30 Calendar days of receipt of the report. Within 30 Calendar days after the comments are submitted, ~~Interconnection Customer~~ Transmission Provider shall tender a draft GIA, together with draft appendices completed to the extent practical. The draft GIA shall be in the form of the Transmission Provider's Board-approved standard form GIA, which is in Appendix 6. Interconnection Customer shall execute and return the completed draft appendices within 30 Calendar Days.
